Hi Jason

Unfortunately, I can't find anything before the 2002 article. Are you looking for a print out of that version of the document?

Additional Comments:

I am looking for the earliest date for this reference:

"Automatic Application -Specific Instruction-set Extensions under Microarchitectural Constraints" by A. Verma, K. Atasu, M. Vuletic, L Pozzi and P Ienne.

The best I found was a presentation at the "Workshop on Application Specific Processors (WASP-1) held in conjunction with eh 35th International Symposium Microarchitecture (MICRO-35) on Nov, 19th 2002.

Note that there is another similar article with the same title but attributed to only K. Atasu, L Pozzi, and P Ienne (my inventors -- Ienne is now apparently Ienne-Lopez) published in 2003 Proceedings of the 40th annual Design Automation Conference

Thanks
